Tom Mohr  
President  
Highway Motors Idealease  
3185 N. Valleypike  
Harrisonburg, VA 22802

Mr. Mohr,

I am writing to outline the Campaign to Stop Stericycle (CSS), a nationally-concerted effort that is exposing Stericycle, the leading medical waste company in the nation, for its collection, transportation and incineration of aborted children and the tools used to kill them. I am also writing to implore you not sign any contracts with Stericycle that involve servicing the abortion industry, and that if Stericycle is already using Highway Motors Idealease trucks for this purpose that you stop allowing them to do so.

Recently, Ryder System Inc. prohibited Stericycle from using its trucks nationwide to service abortion facilities. As a result, Stericycle will likely now be approaching Idealease affiliates to seek lease agreements in place of Ryder. It is important that you understand that if you sign a contract with this medical waste company – whether individually or through a contract presented from the Idealease corporate headquarters – you will be facilitating the means for Stericycle to haul aborted children for incineration. I sincerely hope that you do not desire to be involved in such a business relationship.

Regardless of where you stand on the issue of abortion, it is a fact that Stericycle collects containers that have been filled with the discarded hands, feet and once beating hearts of children and incinerates them with the trash. In fact, Stericycle was recently investigated in the state of Texas for illegally dumping aborted fetuses into a municipal landfill, and admitted to the government that the fetuses are normally transported to an incineration plant for disposal. You may read the investigation report at <http://www.stopstericycle.com/TCEQ-Report>

Additionally, it has been documented in Pennsylvania by the Philadelphia District Attorney's Office that Stericycle had serviced notorious abortionist Kermit Gosnell, who is now facing murder charges. The numerous gruesome containers of aborted fetal remains and bags of "waste" that were found in his basement by investigators are examples of the many murdered children that Stericycle collected and incinerated for Gosnell.

You may also listen to audio from our own investigation of Stericycle's collection, transportation and incineration of aborted children at <http://www.stopstericycle.com/evidence/audio/> During these recorded telephone discussions, Stericycle sales representative Mara Villalobos clearly outlined the packaging protocol for aborted fetuses and explained that each abortion facility receives "incinerate only stickers," so that the boxes of aborted babies may be hauled to their incineration plants. There is no doubt that Stericycle is indeed servicing abortion facilities in this manner nationwide and around the world, and is using leased trucks to facilitate the pickup. Please see our enclosed brochure for further information.

Penske Truck Leasing and Ryder System Inc. have both conducted independent investigations into the matter and have pulled their trucks from Stericycle's routes that include abortion facilities. We hope that you are equally as disturbed about these facts, and we again implore you to not allow Stericycle to use Highway Motors Idealease trucks for the purpose of servicing the abortion industry. We do not want the public to be opposed to your business, but if you partner with Stericycle in this manner, you will be subjected to national resistance from those who value life and the precious gift of children.

At this time, I would like to set up a meeting either by phone or in person to discuss this matter in greater detail. I can be reached directly at (800) 783-7429. Furthermore, kindly provide our office with a response to this letter on or before October 10, 2011 as we are amping up our efforts to expose this evil, which have already resulted in citizen protests at Idealease affiliate offices nationwide.

Thank you in advance for your prompt attention to this extremely important matter, and I look forward to hearing from you.

Sincerely,

*Michael Marcavage*

Michael Marcavage  
Director, Campaign to Stop Stericycle
