

# CAMPAIGN TO STOP STERICYCLE

[www.stopstericycle.com](http://www.stopstericycle.com)

May 24, 2011

Dear Neighbor,

We are going door-to-door to inform you about an extremely important matter regarding one of your neighbors. This may seem like a rare request, but it is important that you understand its immense significance.

As you may already know, Mark C. Miller at 15226 West Rockland Road, is the president of Stericycle, the nation's leading medical waste service. However, you may not be aware that Stericycle is also one of the top collaborators with the abortion industry. Therefore, the brochure that you have received with this letter, entitled *Where Have All the Children Gone?*, serves to outline our nationwide effort called the Campaign to Stop Stericycle (CSS), which is exposing Stericycle for its collection, transportation and incineration of aborted children and the tools used to kill them.

We have conducted a vast amount of research to uncover the facts about Stericycle's participation in the abortion holocaust, and have found the evidence to be overwhelming and sick beyond words. In addition to the brochure, our website, [www.stopstericycle.com](http://www.stopstericycle.com), clearly outlines this evidence and provides much detail on the deep ties that Stericycle maintains with the abortion industry. We encourage you to visit and see the truth for yourself.

We are deeply grieved by Stericycle's actions, and are troubled that Mark Miller continues to turn a deaf ear to the cries of the many people that have been calling upon him to cease his company's involvement with the abortion holocaust. The murdered children that Stericycle collects once had beating hearts, measurable brainwaves, their own special DNA, and little hands and feet that would have tugged at your heartstrings. Instead of disdaining the slaughter of innocent children and distancing from it, Mark Miller and his company, Stericycle, collaborate with Planned Parenthood and other abortion facilities nationwide to burn aborted babies with the trash, and pocket the blood money from this "service." This is eerily reminiscent of the Jewish Holocaust of the 1940's, which ended with the Nuremberg Trials that imposed severe ramifications for those that aided such evils.

Please talk or write to Mark Miller at the above address, or call his desk at Stericycle at (847) 607-2038 and express your serious concerns about his company's collection, transportation and incineration of aborted children and the tools used to kill them. Tell him that he needs to love children and demonstrate it by immediately stopping Stericycle's service to the abortion industry.

Sincerely,

Michael Marcavage  
Director, Campaign to Stop Stericycle
